“The income tax statute conclusively presumes that the Minister’s assessment of an individual’s tax payable is correct unless the taxpayer can establish that it is not.” - Vern Krishna

Jason came to Moodys after gaining experience at the Canada Revenue Agency, specializing in audits of owner-managed businesses. He saw first-hand the costly consequences that common misconceptions and poor tax planning can have on an individual. His empathy for the taxpayer drove a change, leaving the CRA and joining Moodys so that he could assist clients in becoming compliant.

Jason’s experience gives him a perspective from “the other side,” and is a valuable strength when guiding clients through the audit process or when responding to a CRA reassessment. Instead of seeing taxpayers suffer, he’s helping them prepare, and he says, “there’s nothing I enjoy more.”
